

Rising to the Ocean Decade challenges: a regional and city perspective

The event "Rising to the Ocean Decade challenges on a regional and city perspective" will start with a debate about blue economy and the role of science in the Maritime Agenda of Catalonia and Barcelona's blue economy market. After the coffee and networking break, several innovative initiatives on integrated coastal management models will be presented through two moderated and consecutive roundtables. At the end of the meeting, a few synthetic closing remarks will be highlighted and all attendees will be offered the opportunity to join an organized and guided visit, by previous registration.

8.45 - 9.10

ATTENDEE REGISTRATION

9.10 - 10.00
